

## Ravencroft Global Income Fund - O Accumulation Class

### Key Information Document IMPORTANT NOTICE:

Ravencroft Investment Management Limited ('RIML') has followed the methodology prescribed by law (specifically, regulation known as 'PRIIPs') for the preparation of this document. PRIIPs requires that Performance Scenarios must be calculated using total return, being share price movements and dividend income, over the past five years which, in RIML's view, may exceed reasonable expectations of future performance. Accordingly, RIML cautions investors against relying on this Key Information Document as a basis for potential future returns and should refer to the Scheme Particulars for further information.

### What is this product?

<b>Type</b>	This product is a non-UCITS investment fund.
<b>Strategy</b>	The investment objective of the product is to provide investors with a total return with a focus on delivering an income yield that competes with prevailing cash rates with some capital growth. The product will invest in a global portfolio comprising of a range of fixed floating and inflation linked debt securities property and equities.
<b>Intended Investor</b>	This product is best suited for investors who are looking for a total return with an emphasis on receiving an income yield together with the possibility of some capital growth. Investors in the product should be willing to tolerate a medium level of volatility in the value of their investment. Investors should preferably have a time horizon of at least five years.
<b>Maturity</b>	This product is open ended.

### What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low-medium risk class. This rates the potential losses from future performance at a low-medium level and poor market conditions are very unlikely to impact the capacity for you to receive a positive return on your investment.

The following are some of the other risks materially relevant to the PRIIPs which are not taken into account in the summary risk indicator:

The level of income can fluctuate and can go down as well as up and is not guaranteed. Available income can fluctuate from one period to the next due to specific payment dates or fluctuations in fees.

Performance Scenarios Investment £10,000		1 year	3 years	5 years (recommended holding period)
Scenarios				
<b>Stress Scenario</b>	What you might get back after costs	£9,226	£8,691	£8,334
	Average return each year	-7.7%	-4.6%	-3.6%
<b>Unfavourable scenario</b>	What you might get back after costs	£10,285	£11,587	£13,204
	Average return each year	2.9%	5.0%	5.7%
<b>Moderate scenario</b>	What you might get back after costs	£10,814	£12,636	£14,765
	Average return each year	8.1%	8.1%	8.1%
<b>Favourable scenario</b>	What you might get back after costs	£11,354	£13,759	£16,485
	Average return each year	13.5%	11.2%	10.5%

This table shows the money you could get back over the next 5 years (recommended holding period), under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What happens if Ravenscroft Investment Management Limited is unable to pay out?**

You may face a financial loss should the manufacturer Ravenscroft Investment Management Limited, or custodian, EPIC Private Equity, default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

**What are the costs?**

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

**Table 1: Costs over time**

The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios (£10,000)	If you cash in after 1 year	If you cash in after half recommended period of 5 years (after 3 years)	If you cash in at the end of the recommended period of 5 years
Total costs	£162	£494	£836
Impact on return (RIY) per year	1.62%	1.62%	1.62%

## What are the costs? (continued)

**Table 2: Composition of costs**
